KlutchCrew
Emergency Management Planning Platform

INTEGRITY CONSULTING

QUEST — Quality Enhancement Systems and Teams — Bridging the Gap Between Knowledge and Action

Project Overview

The public and private sectors struggle with creating unified emergency management plans because they lack efficient research, communication and collaboration capabilities. Integrity Consulting identified this opportunity and conceptualized a web platform that will address the needs of the emergency management planning community. The KlutchCrew's job was to bring Integrity Consulting's concept of an integrated web platform to life by creating its user interface and documenting its capabilities.
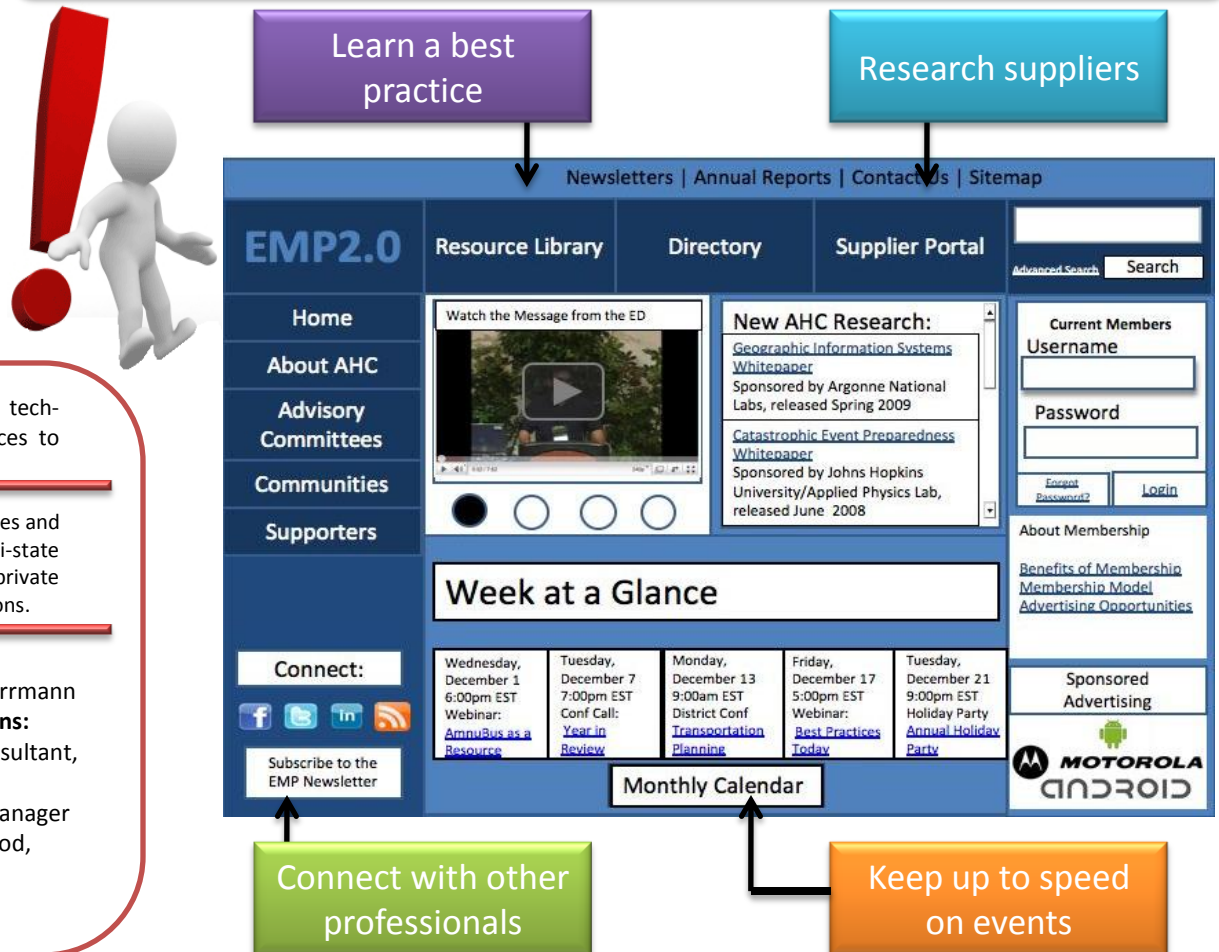

Current State
Disjoint Research and Communication

Proposed Platform
Integrated Research and Communication

Learn a best practice

Research suppliers

Integrity Consulting is a management, information technology, and engineering consulting firm providing services to commercial and federal sector clients in the D.C. region.

Emergency Management Planning creates new resources and funding opportunities for states to support regional and multi-state collaboration efforts among stakeholders from public sector, private sector, higher education, and non-profit/volunteer organizations.
